

Spring

Japanese Courtyard

An elegant re-design of an existing courtyard, to make optimum use of its distinct characteristics. Designed and built by Spring, this Japanese courtyard is a tranquil space which displays a variety of architectural planting.

This planting scheme provides all year round interest, with ever changing foliage colour and dynamic structures. The bespoke bamboo planters are fantastic raised beds, specifically designed for this courtyard.

The silver grey granite gravel creates a pleasant contrast with the stepping stones and polished black pebbles. Traditionally this gravel is raked to replicate the movement and flow of water. The Granite benches provide a place for visitors to sit and enjoy this courtyard garden and escape from the hustle and bustle.
