

Spring

Before...

And after...

Adventure Playground

This site was a large neglected space, which lacked any sense of function and purpose. We transformed the area into a creative learning zone, designed to encourage interaction and self-initiated play.

By incorporating bespoke features such as, sand and water play, this area was completely renewed, providing a new dynamic structure to play times.

On successful completion, this space within a Children's Centre is now a hub of activity, with diverse

opportunities that encourage safe and challenging activities, that will enhance and inform play time for children.
